ELSEVIER

Volume 76, Numbers 1–3, April 1998

Journal of Materials Processing Technology

Contents

Foreword 1
J.A. McGeough, S. Strzelczak

Keynote Papers

Production, computers and humanity 2
T. Honda

Simulation based design 8
M.A. Bossak

Logistic orientated product design 12
H.-P. Wiendahl, H. Stritzke

CAPABLE: an aggregate process planning system for integrated product development 16
P.G. Maropoulos, H.D. Bradley, Z. Yao

CAD/CAM

Intelligent hybrid system for integration in design and manufacture 23
D. Su, M. Wakelam

Information models in an integrated fixture decision support tool 29
N. Bugtai, R.I.M. Young

A new technique for identification of servodrives of machine tools and robots 36
M. Blaszkowski, M. Szafarczyk, M. Al-Taleb

Methodology of off-line software compensation for errors in the machining process on the CNC machine tool 42
Z. Lechniak, A. Werner, K. Skalski, K. Kędzior

Identification and geometrical modelling of complex shape surfaces using coordinate measuring machine and CAD/CAM systems 49
K. Skalski, R. Filipowski, W. Świeszkowski, K. Kędzior, A. Dabrowski, J. Zawora

Die-elasticity for precision forging of aerofoil sections using finite element simulation 56
H. Ou, R. Balendra

Computer-aided design of nett-forming by injection forging of engineering components 62
Y. Qin, R. Balendra

Operating system for laser scanners 69
W. Grudzien, A. Sonntag, G. Seliger

Flexible planning logic for technology planning 76
D. Spath, A. Agostini

Designing a computer-aided manufacturing systems engineering process 82
K. Mertins, M. Rabe, W. Müller

A relation-based product model for computer supported early design assessment 88
H.D. Bradley, P.G. Maropoulosa

Implementation of agile manufacturing—an AI and Internet based approach 96
K. Cheng, D.K. Harrison, P.Y. Pan

Internet tools supporting creation and management of technological environment of CAD/CAM systems 102
Z. Adamczyk, H. Malek

Geometrical characteristics of machined shape for computer aided operation planning 109
F. Tanaka, T. Kishinami

A STEP-based geometrical representation as part of product data model of a plastics part 115
A.M. Shaharoun, J.A. Razak, M.R. Alam

Elsevier Science S.A.

Reverse engineering modelling of free-form surfaces from point clouds subject to boundary conditions 120
J.-P. Kruth, A. Kerstens

Reverse engineering of free-form surfaces 128
A. Werner, K. Skalski, S. Piszczatowski, W. Święszkowski, Z. Lechniak

Robotics

An over-rated control strategy for quick motion or tough supporting in robots 133
S. Kan, Y. Kushihashi, T. Honda

A two-armed cooperative robot system 'Perseus-1' and its applications to product handling 140
T. Honda, T. Mimura, Y. Kushihashi, S. Kaneko, T. Oshima, Y. Kaneko

Expert Systems

An expert process planning system for meat cutting by high pressure water-jet 146
M. Alitavoli, J.A. McGeough

Knowledge based method for touch probe configuration in an automated inspection system. 153
G. Moroni, W. Polini, Q. Semeraro

Simulation of Manufacturing Processes

Computer simulation electrochemical shaping (ECM-CNC) using a universal tool electrode 161
J. Kozak, A.F. Budzynski, P. Domanowski

Process monitoring of electrochemical micromachining. 165
A.K.M. De Silva, J.A. McGeough

Mathematical models for computer simulation of electrochemical machining processes 170
J. Kozak

Concurrent Engineering and Rapid Prototyping

CAx application for process oriented concurrent design 176
E. Chlebus, M. Cholewa, R. Dudzik, M. Kozera

Shaping a thermoplastic object in the desired form without costly mechanical processing. 182
B. Ferroni, G. Baffelli, W. Amaro

Computer aids for engineering change control. 187
G.Q. Huang, K.L. Mak

Manufacturing Processes and Process Monitoring

Tool failure detection based on analysis of acoustic emission signals 192
K. Jemielniak, O. Otman

Selection of manufacturing process in mechanical design 198
M. Perzyk, O.K. Meftah

Optimum blank shape of cylindrical cups in deep drawing of anisotropic sheet metals 203
A.M. Zaky, A.B. Nassr, M.G. El-Sebaie

FMS/CIM

Modelling and design of flexible manufacturing systems using SADT and Petri nets tools 212
K. Santarek, I.M. Buseif

Organisational problems and issues of CIM systems design 219
K. Santarek

Object-oriented modelling of material flow controls 227
I. Wache

Selected aspects of development and planning of production and logistic systems 233
K.W. Helbing, M. Reichel

A new FMS simulator with object-oriented-programming techniques 238
X.N. Li, H.B. Yuan, X.Y. Huang, E.H.M. Cheung

Simulation of Manufacturing Systems/Information Systems/Decision Support Systems

Abstracting performance in hierarchical manufacturing simulation 246
P. Ball

Agent-based production management 252
T. Kuhlmann, R. Lamping, C. Massow

Intelligent decision support 257
T. Kuhlmann, R. Lamping, C. Massow

Issues on the architecture of an integrated general-purpose ShopFloor control software system 261
X. Liu, W.J. Zhang

Analyzing manufacturing process information 270
B. Ghahramani, Z. Wang

Computer-Aided Production Management

A dynamic procedure for defining an order quantity 276
M. Fertsch

Optimization of production process design in small- and medium bath production 279
J. Matuszek, A. Moczała, J. Kosturiak

Computer information systems in complex manufacturing 284
M.A. Flores

An optimisation model for information systems 289
K.A. Reynolds, C.E.R. Wainwright, D.K. Harrison
